

At Discovery High School, we engage with challenging, real-world problems. We interact with content through relevant and meaningful projects while developing, collaboration, communication, creativity, and critical thinking skills that launch students into dynamic futures.

We learn for life.

## Communicators

- We use effective interpersonal skills.
- We utilize multiple means to clearly relay information such as physical gestures, tone, pace, and/or physical or visual supports appropriate to audience and purpose.
- We demonstrate cultural understanding and global awareness when engaging with others.
- We present information in an organized manner to clearly relay ideas with a clear beginning, support and ending with a focus on the most relevant information.
- We can share ideas through the creation of authentic products.

## Creators

- We are innovators & develop, implement, and communicate unique and original ideas.
- We produce polished and neatly constructed final products free of conventional errors in an appropriate medium.
- We pay attention to details through purposeful design and execution of our ideas and products.
- We use design thinking strategies to define, ideate, refine, prototype, and test our ideas.

## Initiators

- We are self-managers.
- We are engaged with our community.
- We demonstrate perseverance.
- We are accountable to ourselves & others.
- We view failure as an opportunity to learn.

## Collaborators

- We work productively and respectfully with diverse teams.
- We develop ideas and products with involvement of all team members, creating a task list that divides project work reasonably and recognizes the special talents of team members.
- We set schedules and track progress toward goals and deadlines.
- We are prepared and focused on group tasks at hand without prompting, engaging in discussions and asking clarifying and probing questions.
- We respectfully address others and ensure everyone is heard, responding thoughtfully to new information and perspectives. Feedback is valued and used to improve goals.
- We are adaptable & flexible.

## Critical Thinkers

- We collect, assess, and analyze relevant information.
- We reason effectively.
- We utilize systems thinking.
- We identify, define, and solve authentic problems and answer essential questions.
- We reflect critically on learning experiences, processes, and solutions.
